

Taller/Shorter

Use Post-it Notes® to help young students learn about scale.

Subject:

Art or Math

Topics:

kindergarten, art,
math

Materials:

5 pack Post-it® Super
Sticky Notes and Post-
it® Easel Pad

Grade Level:

Kindergart

Estimated Time:

20-40 min

01

Draw a stick figure about as tall as your students on an Post-it® Easel Pad. Place it at the base of a blank wall.

02

Have your students draw something that is shorter than they are on a Post-it® Note. Have them place their note on or around the stick figure.

03

Next, have your students draw something that is taller than they are on a Post-it® Note. Have them put this above the stick figure's head.

04

Discuss what the students created and where they placed the Post-it® Notes. This will help to reinforce the concept of scale using something very familiar to them: their own height.
