

Measure Area

Use Post-it® Notes to teach students how to calculate area.

Subject:

Math

Topics:

grades 3rd-8th,
math, measuring,
calculation

Materials:

3 pack 3 x 3 Post-it®
Super Sticky Notes

Grade Level:

3rd-8th

Estimated Time:

20-40 min

01

Give each student a stack of 3" x 3" Post-it® Notes.

02

Have students use (and reuse) Post-it® Notes to measure - in square units - the area of items found in their desks: folders, textbooks, even the desk itself.

03

Younger students can record their findings using the number of square Post-it® Notes as the unit of measure. Older students can calculate the actual area in square inches by using the Post-it® Notes dimensions of 3" x 3" inches.
